To The Hiring Manager:

Please accept my application for summer Software Engineering Intern position. I am an Engineering Master student at Boston University with multiple software internship experience. My university program is compatible with co-op experience for practicum credits. I am confident with Java, performance related protocols, and their analysis.

Developed upon my previous working experience, I understand the process for software development and am committed to produce reliable coding. My current Master program has further prepared me for professional programming experience. I am fluent in multiple programming languages especially in Java and more.

Thank you for considering my application. If you and the team are interested in talking to me, please feel free to contact me at sbowen@bu.edu.

Sincerely,

Bowen Song
